

# rtnkflow - RTCM Correction stream

RTCM Correction streams are used to improve the accuracy of differential GPS systems up to millimeter level order (if the receiver uses multiband high gain GPS antennas)

The correction stream provided is to be used in the Florida state, a subscription can last 6h, 1 month or 1 year according to the purchased plan.

Except for the 6h subscription, the plans provided cover 24/7 stream service. Please consider **ordering only if you have already compatible software** and hardware.

## About Florida:

Location map of Florida in the US.

Florida is an internationally well known US state in the southeastern part of the United States. The Sunshine State (its Nickname) occupies

a long flat peninsula between the Atlantic Ocean in the east and the Gulf of Mexico in the west. Florida is bordered in the north by the US states of [Alabama](#) and [Georgia](#).
