

rtkflow - RTCM Correction stream

RTCM Correction streams are used to improve the accuracy of differential GPS systems up to millimeter level order (if the receiver uses multiband high gain GPS antennas)

The correction stream provided is to be used in the United States, a subscription can last 6h, 1 month or 1 year according to the purchased plan.

Except for the 6h subscription, the plans provided cover 24/7 stream service. Please consider **ordering only if you have already compatible software** and hardware.

Currently, we have operations in **Florida and TX, but we can provide special services to other states upon request**, if we can not, you will be refund and communicated accordingly.

About the United States:

Location map of the United States.

The map shows the contiguous United States. The United States of America is a federal republic. It consists of 50 states, one federal district (the capital [Washington D.C.](#)), five larger territories, and several island territories. The 48 contiguous Continental United States

(sometimes called the Lower 48) and [Alaska](#) are located in North America, while [Hawaii](#) and smaller outlying areas are located in the Pacific and Caribbean.

The United States of America is the third-largest country in the world by area
